

FISCAL NOTE

TO: Chief Clerk of the Senate
Chief Clerk of the House

FROM: James A. Davenport, Executive Director

DATE: March 8, 1996

SUBJECT: **SB 3048 - HB 3084**

This bill, if enacted, will create a classification of 9-1-1 service known as wireless which will include cellular phone service. The bill requires that the service supplier shall levy the emergency telephone service charge based on the jurisdiction of the cellular phone user. Such charge may equal but may not exceed the applicable rate for residential and business classification service users.

The fiscal impact from enactment of this bill is estimated to be an increase in local government revenues to the emergency communications districts. Such increase will depend upon the amount of the charge levied and the number of cellular phones in use in Tennessee. The amount of the increase cannot be determined but can be estimated to exceed \$1,000,000.

This is to duly certify that the information contained herein is true and correct to the best of my knowledge.

A handwritten signature in black ink, reading "James A. Davenport". The signature is written in a cursive style with a large, stylized "J" and "D".

James A. Davenport, Executive Director
